

# How International Schools Partner with NWEA for Student Success

Over 1,000 international schools in more than 145 countries rely on NWEA® assessment tools and professional learning strategies. Our research-based MAP® Suite of assessments helps international educators answer a crucial question: Are my students learning? By delivering precise information in real time about every student, we set educators and students up for success.

For over a decade, NWEA has partnered with international schools to provide the services they need to help students achieve, no matter where they live. We build strong relationships throughout the international community to leverage resources to support student growth.

We partner with the US Department of State's Office of Overseas Schools, and all major accreditation and regional school organizations.

#### **We Offer Precise, Real-Time Information To:**

- + differentiate instruction
- + pinpoint intervention and enrichment needs
- + accelerate students' academic growth
- + maximize instructional time, staff resources, and budget
- + target instructional and professional learning resources

**“When you’re an international school, you’re sometimes very isolated. However, having MAP Growth to talk about student performance is something that brings us together to share our experiences.”**

**Amanda Briggs, Assistant Academic Dean**  
Cobham High School,  
ACS International Schools, Surrey UK

## WHAT YOU NEED

## HOW WE HELP

---

### **An external assessment to measure student growth**

MAP® Growth™ dynamically adjusts to each student to create a personalized assessment experience—whether a student performs on, above, or below grade level.

---

### **To compare performance to other international schools**

Our international data dashboard enables you to compare your school to other international schools in your region, country, membership organization, or worldwide.

---

### **To compare performance to students in the US**

MAP Growth Norms give you a reliable comparison point of student performance in the United States. Our norms feature both status (percentile) and growth indicators for individual students and schools.

---

### **To ensure effective data use by staff**

We offer live and online professional learning to help educators make the most of their assessment data to differentiate instruction, set goals, and establish a culture of data use.

---

### **Support when working with accreditation organizations**

We partner with accreditation organizations to support schools in seeking and renewing their accreditation. Our data helps you meet accreditation standards for the use of data in continuous improvement and performance measurement.

---

### **To know if your students are college and career ready**

We offer a College Explorer tool that shows you how your students are projected to perform on the ACT® and SAT®.

---

### **To monitor progress and provide skill interventions**

MAP® Skills™, our skills mastery and progress monitoring tool, allows teachers to identify skill gaps and assign targeted instructional resources. Mastery checks can be used to monitor progress and gauge responses to intervention.

---

### **To ensure that students are ready for International Baccalaureate® (IB) assessments**

MAP Growth complements the principles of PYP and MYP and provides a school information about students' readiness toward IB Programmes.

---

### **To meet the unique needs of young learners**

MAP Growth K-2 includes rich visuals and clear auditory prompts. In addition to screening and discrete skills tests, the interim assessments help teachers quickly gauge young students' progress.

---

## Set Your International Students up for Success
