

# How private schools partner with NWEA for student success

## NWEA assessments deliver what you need

At NWEA®, our research-based MAP® Suite of assessments helps private school educators answer a crucial question: Are my students learning? By delivering precise, real time information about every student's learning, we set educators—and students—up for success.

Over 185,000 private school students in more than 1,200 schools use MAP® Growth™ to measure growth and evaluate instructional programs.

## Support for private schools

Our team understands the unique needs of private schools and is committed to building strong relationships throughout the private school community to support student achievement and growth in non-public schools.

Partner with us to:

- + accelerate students' academic growth and achievement
- + ensure students are prepared for college and careers
- + pinpoint intervention and enrichment needs
- + maximize classroom instructional time, staff resources, and budget

**“MAP Growth gives teachers immediate results and helps them make data-driven decisions in the student’s learning. It helps me as an administrator evaluate curriculum that drives our instruction. No matter where the students are in their learning process, we can always measure their growth.”**

**Deb Larson-Wooton, Principal**  
Maranatha Christian Academy, MN

## YOU NEED

## HOW WE HELP

---

### **A measure of student growth**

MAP Growth dynamically adjusts to each student to create a personalized assessment experience—whether a student performs on, above, or below grade level. Every question is calibrated to our proprietary RIT scale. Since the scale is continuous across grades, educators trust it to track longitudinal growth over a student’s career.

---

### **To compare performance to other students in the US**

MAP Growth Norms are based on data from over 10.2 million students. They provide a reliable comparison point to national student performance, featuring status (percentile) and growth indicators for individual students and schools.

---

### **To ensure effective data use by staff**

We offer live and online professional learning to help educators make the most of MAP Growth data to differentiate instruction, set goals, and establish a culture of data use.

---

### **To monitor progress and provide skill interventions**

MAP® Skills™, our skills mastery and progress monitoring tool, allows teachers to identify skill gaps and assign targeted instructional resources. Mastery checks can be used to monitor progress and gauge responses to intervention.

---

### **To meet the unique needs of young learners**

MAP Growth K-2 includes rich visuals and clear auditory prompts. In addition to the interim assessment, you receive skill-focused assessments teachers can use to quickly gauge skill development in between more formal checkpoints. MAP® Reading Fluency™ (K-3) is an engaging adaptive assessment that allows teachers to assess oral reading fluency for an entire class in 20 minutes.

---

### **To know if your students are college and career ready**

Our adaptive test aligns to state standards and Common Core, MAP Growth college readiness benchmarks, and a College Explorer tool that shows how your students are projected to perform on the SAT®/ACT®, beginning in the 5th grade.

---

## Set your private school students up for success
