Develop fluent  
readers with the  
science of reading

nwea

# Double K-5 reading growth with a science of reading-aligned solution that quickly identifies and closes reading gaps.

## Get a precise picture of reading fluency with adaptive, time-saving assessments.

Gain comprehensive insights on student reading fluency while freeing teachers from repetitive manual scoring and assessment.

## Double reading growth for every K-5 student with effective 1:1 tutoring.

Efficiently close reading gaps with AI-driven technology that delivers personalized 1:1 tutoring.

## Depend on NWEA's evidence-based approach that effectively develops young readers.

Built from the ground up based on the pillars of the science of reading.

### Assessment + personalized support from Maya

#### Assess

1

Students take the MAP Reading Fluency assessment

#### Connect

2

Results connect to reports and individualized tutoring

#### Grow

3

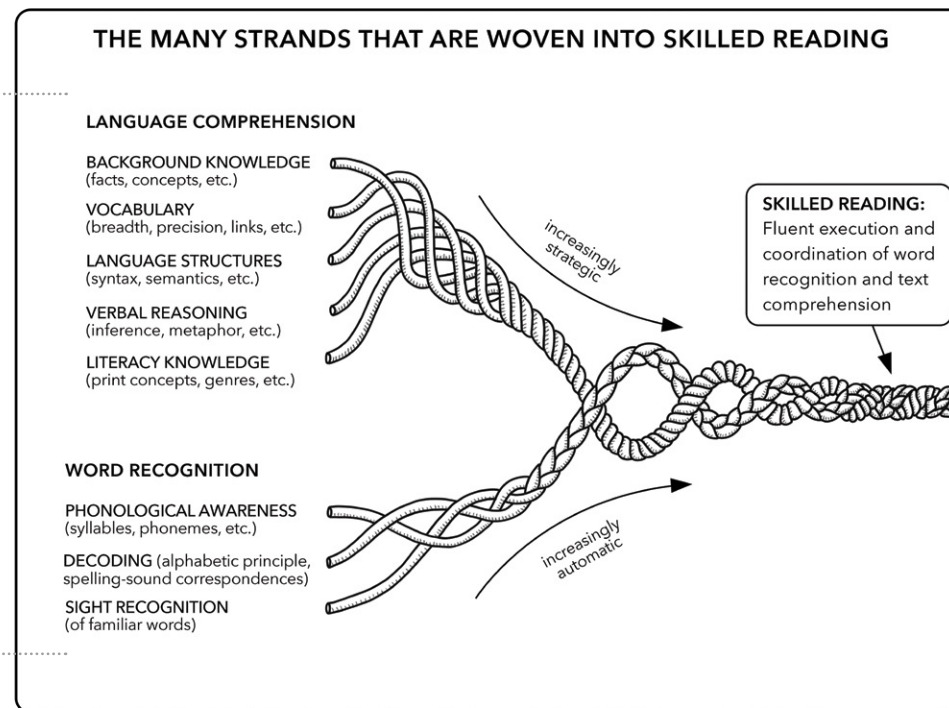

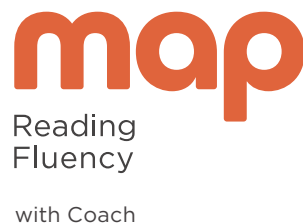

Students practice oral reading and grow through instant microinterventions

..... Grades pre-K-5 | English & Spanish .....

# Develop fluent readers with a research-based approach that's 100% aligned to the science of reading.

The science of reading is a vast body of research that shows how the brain learns to read. It reveals that reading is not a natural process, but one that must be explicitly taught through structured, systematic instruction. This research forms the foundation of best practices in literacy instruction, guiding educators toward proven methods that support all learners, including those with reading difficulties.

MAP® Reading Fluency™ with Coach is built on this science. By combining adaptive assessments with real-time, AI-powered tutoring, it empowers teachers to apply evidence-based strategies in the classroom every day. Turn proven research into measurable growth for every student!

# Develop fluent readers with strong foundational reading skills practice

Strong word recognition comes from three essential skills:

**phonological awareness, decoding, and sight recognition.**

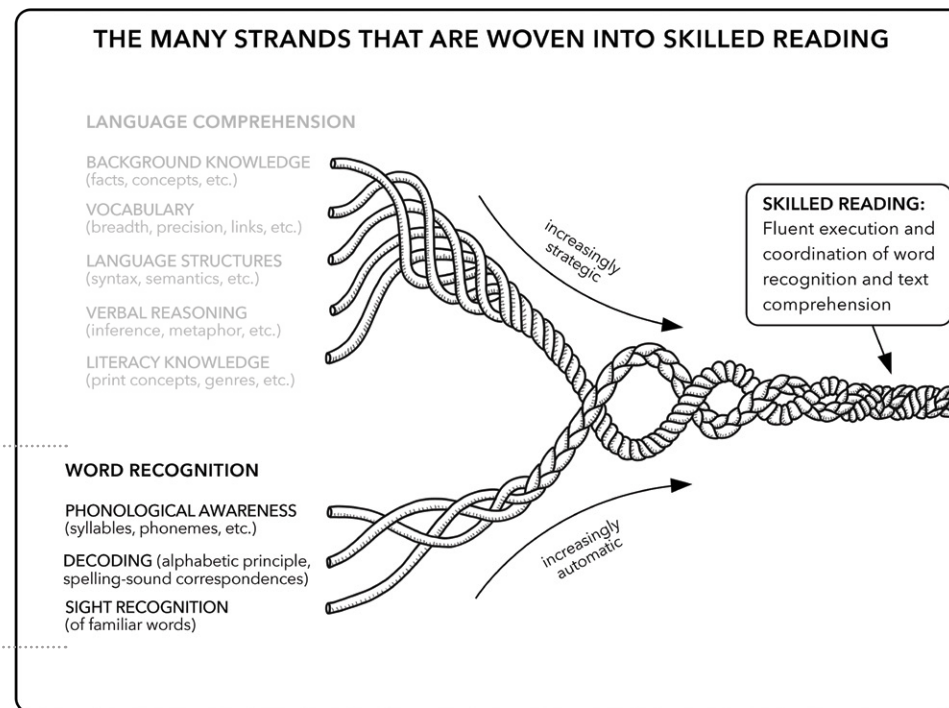

MAP Reading Fluency with Coach builds each one with 60+ personalized, evidence-based microinterventions. From sound matching and Elkonin boxes to decoding practice and high-frequency word recognition, Coach gives students the right practice at the right time, helping them grow into fluent, confident readers.

MAP Reading Fluency with Coach builds foundational reading skills with:

- Adaptive assessments in English and Spanish
- Dyslexia screener for grades K-3
- Early skills Scaffold progression in Coach
- Multilingual learner support

## Maya-delivered microinterventions

- Sound outs & repeat reading
- Picture definition intervention
- Lip sync intervention
- Rhyming intervention

# Develop fluent readers with strong comprehension skills practice

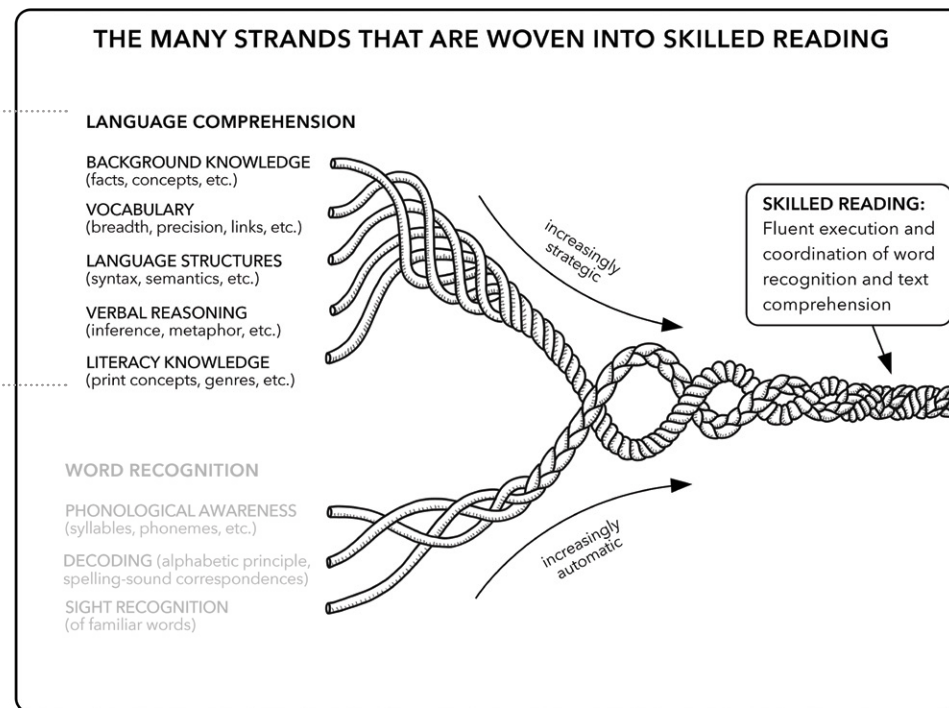

Comprehension grows as students build **background knowledge**, **vocabulary**, **language structures**, **verbal reasoning**, and **literacy knowledge**. MAP Reading Fluency with Coach supports these strands with engaging texts, interactive definitions, visuals, and English-Spanish cognates. Through guided reading and dynamic conversations with Coach Maya, students practice predicting, explaining, and reflecting, turning reading into a meaningful, engaging experience.

MAP Reading Fluency with Coach builds comprehension skills with:

- Vocabulary support with visual aids and cognates
- Morphology instruction (prefixes, suffixes, root words)
- Dynamic comprehension conversations during and after passages
- Diverse fiction and nonfiction texts

## Maya-delivered microinterventions

- Knowledge building intervention
- Vocabulary intervention
- Read along
- Cloze quizzing

# Develop fluent readers with personalized oral reading practice

As students read aloud, Coach Maya actively listens, detecting miscues and offering immediate feedback and encouragement. This one-on-one guidance helps students grow into fluent readers who focus on meaning and making sense of what they read.

MAP Reading Fluency with Coach builds fluency skills with:

- Fluency metrics: words correct per minute (WCPM), accuracy, and prosody
- Audio playback for progress monitoring
- Microinterventions for pacing and rereading
- Lexile Oral Reading levels to inform instructional planning

## Microinterventions aligned to the science of reading

# Develop fluent readers with clear, actionable data

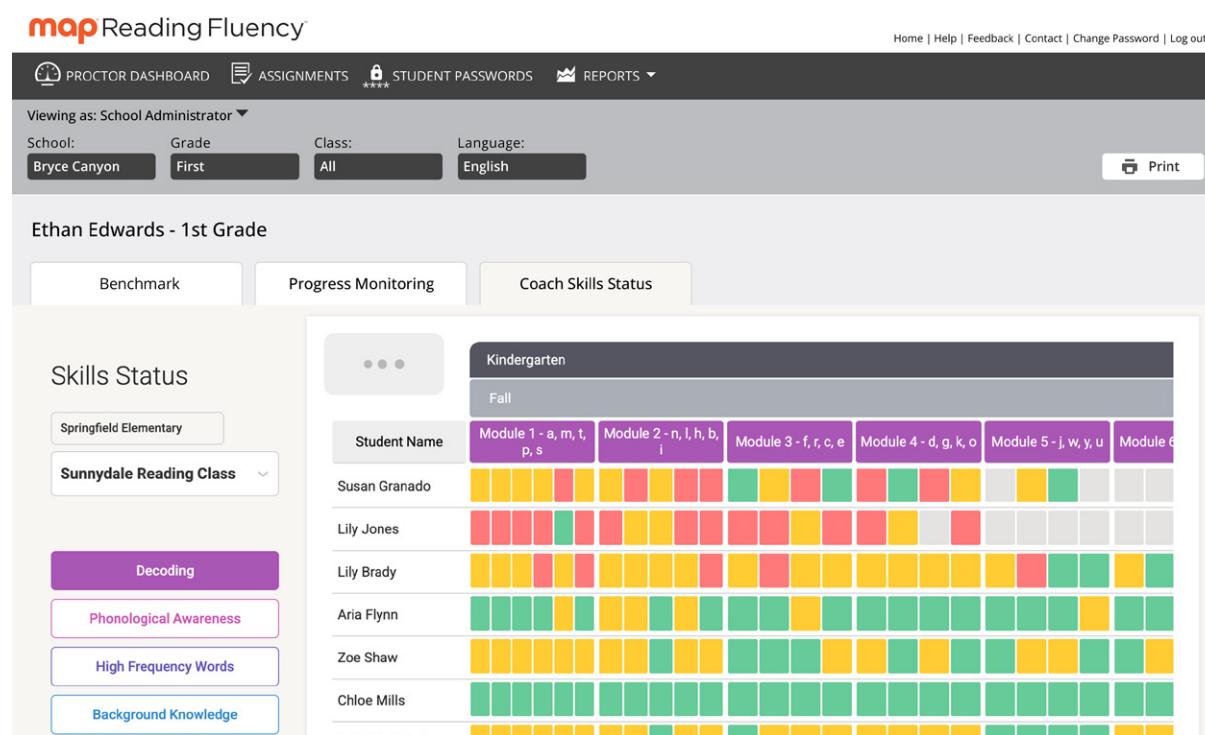

Dynamic reports at the student, class, and school levels provide **clear insights into granular reading skills**, helping educators group students, personalize instruction, and track growth with confidence.

Detailed reports help teachers:

- See the student's specific strengths and weaknesses in foundational literacy
- Provide instructional resources based on individual student needs and zone of proximal development
- Identify at-risk students with universal and dyslexia screening

Teachers can use this class-wide overview of student progress on each of the five science of reading pillars during planning for small groups or interventions to see:

- Where students are excelling and where they need help
- How they can group students for targeted instruction

# Develop fluent readers with evidence-based instruction

Provide teachers with the support to make meaningful, measurable instructional change! NWEA's Science of Reading Literacy Suite offers practical, research-aligned workshops that:

- Translate scientific evidence into practical classroom applications
- Integrate efficient, explicit instructional routines
- Delivers practical tools and resources to sustain educators

With flexible delivery options and a focus on real-world application, NWEA empowers educators to meet diverse student needs and accelerate reading growth.

“My team’s conversations shifted . . . to a focus on . . . figuring out how to help teachers address the major gaps we were seeing. It was like a light bulb went off for the entire team at the same time.”

**Tammy Taylor**

Principal at Great Falls Elementary School, Great Falls, SC
