

# map Reading Fluency

## Turn Reading Fluency data into instructional impact

### Why data-informed reading fluency instruction matters

Early reading success depends on timely insight and responsive instruction. Districts invest in MAP® Reading Fluency™ to understand students' foundational skills, oral reading fluency, and comprehension—but lasting gains occur only when educators know how to translate that data into instructional action.

NWEA Professional Learning supports schools and districts in moving from assessment results to purposeful, data-informed reading instruction. Through hands-on workshops, educators learn how to apply MAP Reading Fluency data to daily instruction, small-group planning, MTSS/RTI decisions, and long-term reading improvement.

### MAP Reading Fluency workshops that empower data-informed instruction

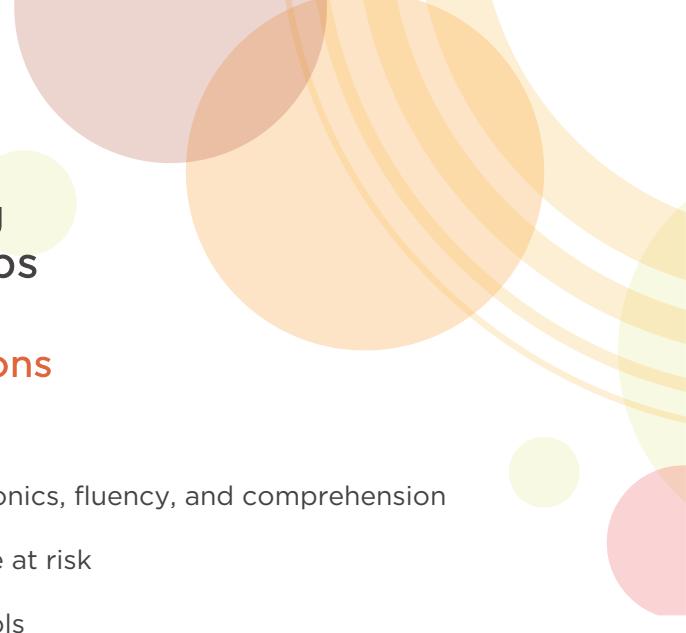

#### **MAP Reading Fluency Informing Instruction**

Supports educators in translating MAP Reading Fluency data into responsive, differentiated instructional plans that align with early reading development.

#### **Leveraging Data to Build Fluent Reading Strategies**

Provides a deep dive into fluency-focused instruction, helping educators analyze data, design effective lesson structures, and implement strategies that improve reading fluency—supported by follow-up coaching.

Together, these workshops help districts and schools build a coherent pathway from reading data to instructional action.

## Benefits of engaging in MAP Reading Fluency data-to-instruction workshops

### Earlier, more accurate instructional decisions

Educators learn how to:

- Identify strengths and gaps in phonological awareness, phonics, fluency, and comprehension
- Use screening information to identify students who may be at risk
- Interpret trends across classrooms, grade levels, and schools

Result: Instruction is proactive—addressing needs before reading difficulties compound.

### Responsive reading development support for every learner

Through structured planning processes, teachers learn how to:

- Design flexible small-group instruction
- Adjust pacing, scaffolding, and instructional routines
- Align instruction to students' developmental reading pathways

Result: Teachers meet students where they are and move them forward with confidence.

### Improved fluency instruction and reading outcomes

Educators deepen their understanding of reading fluency by learning how to:

- Interpret oral reading rate, accuracy, and comprehension data
- Connect fluency development to overall reading success
- Apply research-aligned lesson structures and instructional strategies

Result: Students build the accuracy, automaticity, and expression needed for comprehension.
