

Premium Reports

Deep Insights That Empower You to Create Powerful Solutions for Your District

MAP® Growth™ gives you crucial information about each one of your students. Now you can be even more informed with detailed reports that dive deeper into your student assessment data. The Premium Reports provide you with powerful, district-wide insights you can use to support growth for all your students. Each of the four reports gives you a unique look into key aspects of your district's academic performance—allowing you to tackle learning barriers, identify strengths and opportunities, and gain a greater understanding of how to help your students succeed.

You can purchase reports individually or choose all of the Premium Reports to get the most comprehensive insights about your schools and district.

Insights Report

Get clear, actionable insight into the academic performance and growth of students throughout your district. You'll find multiple sections of powerful data to help you explore your district's most pressing questions, like:

- + Is our growth strong over time?
- + How is growth by grade and subject?
- + Are we proficient and college ready?

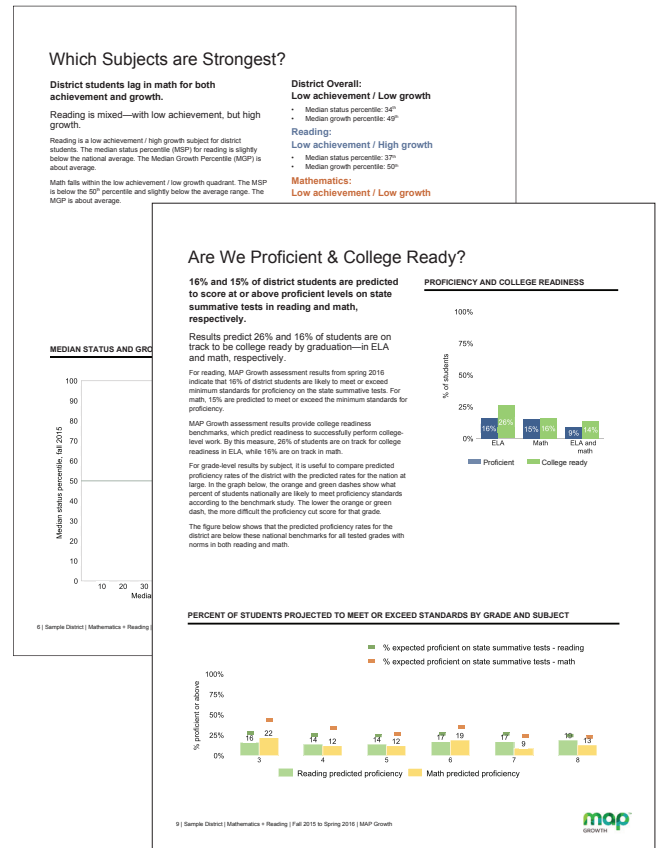

This report is an invaluable resource to help you communicate student performance and growth to important stakeholders, prioritize problems that need to be solved, and make decisions about resource allocation and program improvement. Its narrative reporting and clear, simple graphics make the report easy for you—and other stakeholders—to digest, understand, and take action on.

Growth Report

Easily explore your students' growth and performance with this interactive tool. You'll discover exactly where students in your district are growing the most and least, with many useful ways to look at your data: by school, performance level, grade, ethnicity, or gender. It's also easy to see and share how your students' growth compares to national norms through the report's compelling design.

In addition, this report gives you important insights into student testing conditions. These insights enable you to understand when certain key performance indicators,

such as inadequate or inconsistent time spent on a test, may affect a student's growth results. You can factor out any atypical testing conditions to give your district the most accurate and actionable information about your students' growth.

Similar Schools Report

Look beyond national norms and get an apples-to-apples comparison of your students. Use this report to compare your student growth to the growth of similar students from schools with similar demographics across the country (e.g., urban schools, suburban schools, etc.). Within these schools, students are matched based on the same grade level, subject area, starting RIT score, and number of instructional weeks between the test events being compared.

Having this type of comparative data allows you to compare growth of similar students in similar schools across the country, see exactly where your schools may be falling short, and understand the level of performance that's possible to obtain. You can then take appropriate action to improve student growth and achievement—whether that means setting new goals, using practices that are proving to be successful in other schools that are similar to yours, or re-allocating funds into school improvement initiatives.

You can also use this report to get information on student testing conditions. This helps you to understand when certain key performance indicators, such as inadequate or inconsistent time spent on a test, may affect a student's growth results. You can factor out any atypical testing conditions to give your district the most accurate and actionable student growth data.

Instructional Report

Obtain robust information about how well your students understand instructional topics and detailed objectives—and how their knowledge changes over time. You can use this report to dig into detailed questions about instruction, like:

- + Do students understand time better than money?
- + How has student knowledge of adding and subtracting fractions with unlike denominators improved?
- + How did my fourth grade students do on the third grade standards last year?

This granular knowledge helps you effectively analyze your instructional program, giving you the insight you need for key decisions about focusing instruction, curriculum support, improving teacher content knowledge, and more.

Bonus: These Reports Come With a Free Consultation

Each of these reports provides powerful data—and powerful data coaching comes with it. In addition to a user's guide for your report, you'll receive up to two hours of online consulting with a professional learning consultant to help you deeply understand your data and use it to take meaningful action. If you'd like more extensive support for you and your staff, we've got you covered with a personalized data coaching program.

Your Schools Need You to Take Action

Gain a deeper understanding of how to best support your students with invaluable district-wide insights from four powerful reports. Contact your NWEA® account manager today at 866-654-3246.

NWEA® is a not-for-profit organization that supports students and educators worldwide by providing assessment solutions, insightful reports, professional learning offerings, and research services.
