

MAP Suite for early learning

Early learning insights for a lifetime of achievement

Successful early learning is critical to long-term academic success. When educators have deep insight about students' progress in grades K-3, they can help every student develop a strong foundation for lifelong learning.

With the MAP® Suite early learning solution from NWEA®, you can fulfill your district's commitment to helping students in grades K-3 learn to read and develop early math skills.

- + Equip teachers to help students read proficiently by grade three
- + Identify students at risk and reveal where they need additional support
- + Establish a strong foundation for academic success

“MAP® Growth™ allows us to create a personalized learning ‘road map’ for every student at a very early age. This critical time during the years of early literacy development is when we begin to see achievement gaps in reading form and then widen. MAP Growth helps us address those gaps, enabling struggling readers to catch up and achieve grade-level proficiency.”

Melody Morgan
Director of Accountability and Assessment
Springdale School District, AR

MAP Suite early learning solution

The MAP Suite early learning solution is an integrated system of assessments that work together to give you a comprehensive picture of every young learner's strengths and opportunities.

MAP Growth
Precisely measure
growth and performance

MAP Reading Fluency
Assess oral fluency for a
whole class in 20 minutes

Skills Checklist
Assess knowledge
of specific skills

Screening Tests
Set a baseline
for new students

MAP Growth

MAP Growth helps educators identify students' learning needs, measure growth, and project proficiency on summative assessments. This interim assessment adapts within and across grade levels to assess math and reading performance on content aligned to state standards. Educators can use this data to inform instruction and track growth over time. To ensure accessibility, our K-2 assessment offers audio support, and K-3 reading and math assessments are available in Spanish.

Skills Checklist

Skills Checklists use an isolated skill-by-skill format to focus on early mathematics and learning-to-read concepts. Educators can use these quick K-2 measures on demand to gather immediate feedback about skill development.

MAP Reading Fluency

MAP® Reading Fluency™ is an adaptive assessment that efficiently measures oral reading fluency, comprehension, and foundational reading skills for students in grades K-3. Group administration enables assessment of an entire class in just 20 minutes. Automatic recording and scoring save teachers time and deliver data that informs reading placement and instruction. Administer this assessment alongside MAP Growth while students are in the emergent and early stages of literacy development.

Screening Tests

Screening Tests help assess early literacy and early numeracy at the start of kindergarten or end of pre-kindergarten to establish a baseline of skill development before a child is ready for MAP Growth or MAP Reading Fluency.

**NWEA is proud to partner with over 10,000 schools, districts,
and education agencies to provide assessment solutions as
part of our commitment to helping all kids learn.**
